

Dr. Aleksandar Mitov MSc MPhil

Reducing healthcare  
costs, by increasing  
human natural  
resistance  
with ThermoStabilizer™

Effectiveness of 3000 treatments as reported in randomised controlled trials selected by *Clinical Evidence*. This does not indicate how often treatments are used in healthcare settings or their effectiveness in individual patients.

**Conventional medicine  
needs a paradigm shift**

burdening society

**reactive** > **preventive**

relieving society

costly  
↑  
**reactive > preventative**  
↓  
economical

**Current paradigm: reactive**

**Only 2.8%** of total health expenditure  
dedicated on prevention programmes  
(EU average)

**By 2050 the number of people in the EU  
aged 65+ will grow by 70%. The 80+  
age group will grow by 170%**

**2 on 3 persons 80+ will have a chronic  
disease**

**Healthcare costs for cardiovascular diseases takes 12% of total health expenditure \***

(around 75% all chronic diseases)

# Change is needed

focus  
on  
**PREVENTION**

# 4 Pivotal Criteria

- 1. Scientific Sustainable**
- 2. Enhancing resilience**
- 2. Measurable Results**
- 3. Cost Effective**

# 1. Scientific Sustainable

- Must receive scientific endorsement based of understanding of process

# 2. Enhancing resilience

- Must strengthen the body naturally, causing lasting effects

# 2. Measurable Results

- Must enable objective assessment of pre and post condition — beyond ‘feel good’

# 3. Cost Effective

- Must reduce the pressure on the healthcare budget

# What is Thermoregulation Method about?

It is all about  
**plant based nutrition**  
**Non Invasive Blood Analysis**  
**natural oils**

# Scientific Sustainable

**“Phytotherapy” in published scientific articles**

*Source: US National Institute of Health*

Scientific Sustainable

## Plant – based Diet

### The CHINA Study

"produced more than 8000 statistically significant associations between various dietary factors and disease."

*T. Colin Campbell PhD*

**“Diabetes is curable” 2006**

**“Reversal of type 2 diabetes:  
normalisation of beta cell function in  
association with decreased pancreas and  
liver triacylglycerol”,  
*Taylor et al. 2011***

# Scientific Sustainable

**Natural cold pressed oils,**  
in doses given by nature itself, easily  
absorptive and familiar to our bodies,  
helps the body to gradually establish  
balance and heal itself.

**Vis Medicatrix Naturae**

# Scientific Sustainable

## Grape seed oil / extract (GSE)

“Inhibits human breast carcinoma MCF-7, human lung cancer A-427 and human gastric cancer CRL-1739 cell growth.”

“Inhibits growth, induces cell-cycle arrest and causes apoptotic death of human breast carcinoma MDA-MB468 and prostate carcinoma DU145 and LNCaP cells in culture.”

“GSE exerts anti-inflammatory, anti-bacterial, anti-viral, anti-nociceptive, and other health beneficial effects in human disease conditions such as atherosclerosis, hyperglycemia, etc .”

# Inhancing Resilience

● **TBC**

# Measurable Results

## AMP Non-Invasive Blood Analyzer

**117** parameters in **6** minutes with **instant** reporting

# Measurable Results

Based on processing of behavior of  
**temperature indicators in  
representation points**

(bifurcation of the carotid artery: on the left and on the right, in axillary and abdominal areas)

# Measurable Results

based on

kinematic **laws** of mass transfer

functioning of **receptor** and **mediator**

molecular kinetic exponential relationship

between **response rate** and

**temperature**

transformation of temperature into

**radiation energy.**

# Cost Effective

Prevention  
is by far more cost effective than  
intervention.

Ex?

Cost Effective

**Brief prophylactic medical examination  
without considerable expenses and  
non-invasive**

there is a solution

are we **bold** enough to embrace it ?
